SUMMARY

Full-Stack Developer with 2+ years building and shipping production-ready SaaS platforms with Next.js, NestJS, TypeScript, and PostgreSQL. Developed a real estate ERP, multi-role LMS, and AI-powered developer SaaS, with a strong focus on scalable architecture, authentication, payment systems, and clean, maintainable code.

SKILLS

Programming languages: JavaScript (ES6+), TypeScript

Frontend: React, Next.js, Tailwind CSS, Tanstack Query, Tanstack Table

Backend: Node.js, NestJS, Prisma ORM, Mongoose ODM

Databases: PostgreSQL, MongoDB

Tools & Deployment: Git, GitHub, Vercel, Netlify, Render, GitHub Copilot, Claude Code

Languages: English (fluent), Arabic (native)

PROJECTS

Bayti – UAE Real Estate Platform | [Github](#) | [Live](#)

- Built a full-stack real estate platform featuring an ERP admin system with role-based access control, location mapping, and secure asset uploads to manage properties, bookings, and agents.
- Implemented two-factor authentication, property and booking workflows, rich-text blog management, transactional email, and a PostgreSQL database using Prisma.

Academiq – LMS SaaS Platform | [Github](#) | [Live](#)

- Developed a multi-role LMS SaaS featuring multi-tier access portals, video streaming infrastructure, course progress tracking, and integrated Stripe subscription billing.
- Built course creation and enrollment workflows, lesson progression and completion tracking, instructor dashboards, transactional email notifications, and video streaming with Mux.
- Managed complex PostgreSQL databases using Prisma ORM and integrated Cloudinary for optimized file handling.

DevNest – AI-Powered Developer Knowledge Hub (SaaS) | [Github](#) | [Live](#)

- Built a full-stack SaaS for developers to store, organize, and search snippets, prompts, and notes, featuring automated Stripe subscriptions and AI capabilities via Gemini.
- Implemented AI-powered code explanations, content organization, Cloudinary file uploads, transactional email workflows, and Stripe webhook handling for subscription state synchronization.
- Secured OAuth authentication flows and established a component testing suite using Vitest.

EDUCATION

Bachelor of Computer Science
The University of the People, California, USA

2022-2025
