EDUCATION

California, USA

Bachelor of Computer Science, 3.96 / 4.0

PROFESSIONAL SUMMARY

Full-Stack Web Developer building production-ready web applications. Experienced in designing and implementing end-to-end systems including authentication, REST APIs, database architecture, and responsive user interfaces. Focused on scalable system design, performance optimization, and delivering secure, maintainable software.

Handles both frontend and backend development to deliver complete features from concept to deployment with strong emphasis on clean architecture, code quality, and production reliability.

PROJECTS

Bayti – UAE Real Estate Platform

Tech Stack: Next.js, Node.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, ShadCN UI, Framer Motion,

Full-stack real estate platform with an ERP-style admin system for managing properties, users, bookings, and content.

- Designed and implemented a role-based system for secure access control between admins and clients using authentication and authorization flows
- Built an ERP-style admin dashboard to manage properties, agents, bookings, users, and blog content from a single interface
- Developed a scalable PostgreSQL schema using Prisma to support complex relationships between properties, users, and bookings
- Implemented a full property booking system with date/time scheduling and tracking functionality
- Integrated a blog CMS with rich text editing for publishing real estate content and updates
- Added secure media upload handling for property images using UploadThing
- Integrated LocationIQ API for property location mapping and display
- Implemented transactional email workflows using Resend
- Enhanced UI/UX with responsive design and smooth animations for cross-device usability

Academiq – LMS SaaS Platform

Tech Stack: Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, ShadCN UI, Redis

Learning Management System (LMS) SaaS platform that enables instructors to create, manage, and monetize courses while providing students with a structured and interactive learning experience.

- Designed a multi-role LMS architecture supporting students, instructors, and administrators with secure role-based access control
- Built a scalable course management system with structured modules, lessons, and rich content editing capabilities
- Implemented a video-based learning system with progress tracking and resume-from-last-lesson functionality
- Developed instructor tools for course creation, content organization, and student engagement tracking
- Integrated Stripe subscription billing with coupon support and secure payment workflows for monetized courses
- Built a real-time learning dashboard to track student progress and course completion status
- Implemented authentication and session management using BetterAuth with secure access flows
- Designed a scalable backend using Prisma ORM with PostgreSQL for course, user, and progress relationships
- Integrated video streaming (Mux) and media storage systems for optimized learning content delivery
- Added transactional email system for notifications, updates, and user engagement workflows
- Implemented rate limiting and URL filtering for secure and optimized API usage

Bayro – E-Commerce Platform

Tech Stack: Next.js, Node.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, ShadCN UI, Stripe

E-commerce platform designed to handle product management, order processing, payments, and customer workflows with a scalable admin system and secure checkout experience.

- Designed and built a full stack e-commerce system with separate customer and admin workflows using role-based authentication
- Implemented a secure checkout system integrating Stripe and PayPal for payment processing flows
- Developed a complete product and inventory management system with CRUD operations for admin control
- Built an order management and tracking system for handling customer purchases and order lifecycle states
- Implemented authentication and protected routes with secure session handling
- Designed a scalable database schema using Prisma ORM with PostgreSQL for products, orders, and users
- Integrated Cloudinary for optimized product image storage and delivery
- Built transactional email workflows using Resend for order confirmations and updates
- Developed a responsive UI optimized for both desktop and mobile shopping experiences
- Implemented end-to-end type-safe validation using Zod across frontend and backend to ensure data consistency and reduce runtime errors.

SKILLS

Programming languages: JavaScript (ES6+), TypeScript

Frontend: React, Next.js, Tailwind CSS, ShadCN UI, Mantine UI, Framer Motion, TanStack

Backend: Node.js, Prisma ORM, Mongoose ODM

Databases: PostgreSQL, MongoDB

Auth & Payments: BetterAuth, Stripe, PayPal

Tools & Deployment: Git, GitHub, Vercel, Netlify, CI/CD

Languages: English (fluent), Arabic (native)
